

# Why I Joined Amphenol LTW?

**Julien Kuoch**

**RD NPI Engineer**, Taipei, Taiwan

**6-Month Internship with Evolution as an Expatriate** at Amphenol LTW

Spoken Languages: French, English, Mandarin

**FOR THE UNIQUE  
EXPERIENCE &  
CULTURAL DIVERSITY**

## 1. What is your education background?

I graduated with a Master Degree of Science in Industrial and Mechanical Engineering from 'Arts et Métiers Paris Tech' School, in France. My major is Entrepreneurship and Management of Innovation.

## 2. Why did you choose Amphenol LTW for your internship?

Amphenol LTW is part of a global network which promotes entrepreneurship through one of the most competitive market in the industry: electronics. I always believed that facing competition and adversity could allow me to grow faster while pushing you to learn how to achieve goals quickly. Living this experience in Asia emphasizes all of it, as I am pushed to learn more about the culture and practice Mandarin every day.

## 3. To you, which assets are required to succeed during an internship at Amphenol LTW?

As a student, I think being curious, having a set of skills and goals are great assets to succeed.

## 4. What did your added value bring to ALTW during your internship?

My added value brought to the company some hard skills, for example, software, foreign languages and knowledge in Mechanical Engineering.

## 5. What is the most exciting project you have worked on?

The most exciting project I worked on is confidential.

## 6. How this internship can benefit you personally & professionally?

This internship was fulfilling professionally as it was for completed my Master of Science. I had the opportunity to prove myself I could achieve different tasks and work in a challenging environment. Working with older colleagues helps me to be more mature and confident. I learnt faster from my colleagues' experiences while building with Amphenol LTW new opportunities. Since I worked at ALTW, my Mandarin speaking skill improved a lot.

## **7. Why would you recommend this internship at Amphenol LTW to students and expatriates?**

If you feel like building up a career from the ground up, Amphenol LTW provides you a wide vision of today's industry. You'll have the chance to be part of many different projects in different markets, from lighting to renewables energy, from the land crops to aerospace.

After I graduated, ALTW kindly offered me a job position. Of course, I've accepted to **start my career** here at ALTW. It can happen to you too!
